INTERNSHIPS

SDE Intern

Jun 2026 – Aug 2026

Bank of New York Mellon (BNY)

Chennai, Tamil Nadu

- Built a chat agent on BNY's internal **Eliza** platform that converts natural language queries into GraphQL requests and retrieves data through the internal Query Service of the **Custody platform**.
- Built a dashboard agent that interprets broad user queries and dynamically generates dashboards with relevant cards, charts, and other visualizations based on user intent.
- Worked with Python-based serverless functions and LLM API's that connect the agents with internal Custody services, handle query execution, and control the flow of requests.

Web Developer Intern

May 2025 – Jul 2025

C2C Advanced Systems Chennai Ltd.

Chennai, Tamil Nadu

- Built **Organica Ops**, a full-stack enterprise collaboration platform using React, Node.js, Express, and MySQL for project tracking, task management, meetings, and reporting.
- Implemented a 5-role RBAC system for Admin, Manager, Team Lead, Employee, and Customer using JWT authentication and role-based API access.
- Developed 8+ backend modules with RESTful APIs, MySQL stored procedures, file uploads using Multer, and automated meeting invites and task notifications using Nodemailer.

PROJECTS

UrbanResolve | AI-Powered Civic Issue Management Platform

[\[GitHub\]](#)

Spring Boot, React, PostgreSQL, Google Gemini API

- Built a civic issue reporting platform that accepts reports from a web application and Telegram bot, using Google Gemini to classify photo and location-based submissions and route them to the relevant department.
- Implemented spatial duplicate detection using PostgreSQL queries and added SLA tracking with alerts before the expected resolution time.
- Implemented a 4-role RBAC system for Citizen, Field Worker, Officer, and Admin using Spring Security and JWT authentication, with separate access for public issue information.

HireMatrix | Recruitment Management Platform

[\[GitHub\]](#)

MongoDB, Node.js/Express, React, Google Gemini API

- Built a recruitment management platform using MongoDB, Node.js/Express, and React for job posting, candidate tracking, and a drag-and-drop hiring pipeline with 5 stages.
- Integrated Google Gemini to evaluate resumes against job requirements and added Google Calendar and Meet integration for interview scheduling.
- Implemented a 5-role RBAC system for admin, recruiter, hiring manager, interviewer, and applicant with JWT and refresh-token authentication, interview feedback, and CSV reporting.

SKILLS

Languages:	Java, C/C++, Python, JavaScript, SQL
Frameworks / Tools:	Spring Boot, React.js, Node.js, Express.js, PostgreSQL, MongoDB, MySQL, GraphQL, Git, Jira
Familiar With:	Generative AI / LLMs, Prompt Engineering, Postman, Linux
Competencies:	Data Structures & Algorithms, OOP, System Design, RESTful APIs

EDUCATION

SRM University AP

B.Tech Computer Science Engineering (AI & ML), Minor in Marketing | **CGPA: 9.29/10**

Jul 2023 – May 2027 (Expected)

Guntur, Andhra Pradesh

Kendriya Vidyalaya HVF, Avadi

12th C.B.S.E (Science Stream) | **87%**

Mar 2023

Chennai, Tamil Nadu

Kendriya Vidyalaya HVF, Avadi

10th C.B.S.E | **91.4%**

Mar 2021

Chennai, Tamil Nadu
